Professional Summary

Full-Stack Developer with over 3 years of experience building mobile and web applications from scratch. Skilled in modern JavaScript/TypeScript frameworks such as Flutter, React, and Next.js, combined with backend development using Node.js, NestJS, and Express. Strong background in clean architecture, API design, and scalable backend systems. Passionate about delivering high-quality code, excellent UX, and collaborating in Agile environments. Looking to contribute to impactful projects with global teams.

Technical Skills

- **Frontend:** Flutter, Android (Jetpack + Kotlin), React, Next.js, TypeScript
- **Backend:** Node.js, Express.js, NestJS, PostgreSQL, Firebase
- **Tools & DevOps:** Docker, Git, GitHub, Azure DevOps, Trello, Figma, Supabase

Professional Experience

Freelance Full-Stack Developer

Remote | Dec 2022 – Present

- Designed and developed two cross-platform mobile apps using Flutter, with Firebase and Supabase for authentication and local storage integration.
- Built RESTful APIs using Node.js, Express, and NestJS, optimizing performance through query optimization and basic caching.
- Collaborated with clients on UX/UI using Figma and implemented feedback-driven design improvements that boosted user retention.
- Deployed web apps and backend services in Dockerized environments on self-managed servers.

Quality Systems Analyst

Financiera FDL – Managua, Nicaragua | Apr 2024 – Present

- Perform functional validation of internal applications through manual test cases.
- Collaborate with cross-functional teams (mobile, web, backend) using Agile/SCRUM methodology.
- Track bugs and improvement requests via Azure DevOps.
- Support testing environments using Docker and assist in deployment validations.

Certifications

Scrum & DevOps Certification

CETIC – Microsoft Partner Learning | Aug 2024

Duration: 20 hours
